

# Azure SQL Database Managed Service

Enhance business productivity with Microsoft's PaaS solution, coupled with our Azure SQL Managed Service

Moving your on-premises and hosted data to a fully managed Azure SQL Database can bring you greater cost-savings, operational efficiencies and availability. But when it comes to the database management side, you want a services provider you can access quickly and easily, who you can rely on for expert advice and support.

As Microsoft Gold Partners, we provide best-practice Azure SQL migration, so you quickly reap the benefits of cloud transformation. Beyond deployment, leave the database management to us. You'll benefit from high availability with our 24\*7 proactive incident management, and optimal application performance with our ongoing database and application-centric tuning.

## What's included in our Azure SQL Database Managed Service?

- Azure SQL tuning
- Monitoring and alerting
- Dashboard
- Defined Service Catalogue
- Azure SQL database implementation
- Health-check and baseline of the environment
- Quarterly ongoing Azure SQL health-checks
- 24\*7 incident management

## Why Microsoft Azure SQL Database?

Coupled with our Azure SQL support, Microsoft's cloud offering becomes a powerful solution, offering several benefits:

- Flexible serverless computing and hyperscale storage to rapidly adapt to your business' changing requirements.
- Advanced data security, including layers of protection, built-in controls and intelligent threat detection.
- Built-in AI and machine learning to help optimise performance.

## Key Benefits

	<b>Best practice migration</b> Get migration right first time, minimising disruption to your workforce and ensuring you reap the benefits of cloud transformation.
	<b>Optimal database performance</b> Ensure your database is running at optimum performance – now and in the future – with expert, ongoing management.
	<b>High availability</b> Reduce downtime, thanks to our 24*7 proactive incident management service.
	<b>Business productivity</b> Deliver consistent, high-performing applications to your teams, by relying on our Azure SQL tuning service.
	<b>Expert support</b> Turn to our accessible, UK-based team of Database Administrator (DBA) experts for advice and support.

## Why N4Stack?

Our DBA support team is accessible, UK-based and has extensive experience designing, deploying and managing SQL environments. They're Microsoft certified, regularly undertaking training to keep up to date with technology developments, and hold security accreditations including ISO:27001 and SC-clearance.
